

# AR3600®

## ASPHALT AND TAR REMOVER

AR-3600® ASPHALT AND TAR REMOVER IS A  
NATURAL, SAFE WAY OF CLEANING TAR  
AND ASPHALT OFF OF PAVING EQUIPMENT

AR-3600® is safe for people and the environment. This biodegradable solution is a natural and effective replacement for fuel oil, kerosene, gasoline and damaging materials formerly used to clean equipment.

AR-3600® is useful for removing coke and other deposited materials present in heat transfer oil lines without costly long term plant shutdowns. It works under all climatic conditions because it is NOT sensitive to the ambient temperature. AR-3600® also preserves painted surfaces under unwanted asphalt residue. Avoid costly cleanup fines from the EPA with this biobased product. Save time, labor, and money with AR-3600®.

**A USDA BioPreferred Product**  
**93% biobased material**

**PAVEMENT SOLUTIONS**

### THE BENEFITS ARE HUGE

Effectively removes *all* asphalt formulations including high-performance latex polymers

Non-toxic - NO hazardous chemical exposures

Biodegradable and environmentally friendly

Safe on painted surfaces - won't harm your finish

Safe on plastic surfaces, including vehicle brake lenses

Safe on all metals, including brass distributors and other application/metering equipment

Unique chemistry designed for better penetration and easier clean-up

Simple water washdown

Excellent degreaser - may be used in parts washer as a cold degreaser

Works on hot or cold mixes
