

PASS® QB

Rejuvenating Fog Seal

- A cationic emulsion containing a rejuvenating agent, specialized asphalt and superior polymers.
- Penetrates, seals, rejuvenates and aesthetically enhances asphalt pavements.
- Ready for return traffic in as soon as two hours.
- Prevents further degradation of the pavement surface by inhibiting raveling, water intrusion and oxidation.
- Restores light end fractions to the asphalt.
- 2-4 year life extension.
- Typical application is .08 to .12 gal/yd².
- Fall and spring applications are recommended.

PASS® CR

Rejuvenating Chip Seal

- A cationic emulsion containing a rejuvenating agent, specialized asphalt and superior polymers.
- Used as a mass crack sealer on roads that conventional treatments can not address.
- Return to controlled traffic in one hour—climate dependent.
- Conventional equipment used with the addition of a scrub broom.
- Outstanding adhesion even in cool weather.
- 5-7 year life extension.
- Application rates between .25-.45 depending on aggregate selected.
- Fall and spring applications are recommended.
- Expands aggregate choices.
